

PROP CERTIFICATION

By Owner

During the 2010 Key West World Championship race, one of the race boats lost a prop blade. The blade landed in the water in a spectator area of Ft Taylor beach and was reported to the US Coast Guard. After they investigated the incident the US Coast Guard is requiring Super Boat International to have **all race boat props** certified by a prop manufacturer or independent lab. This certification is a requirement of the inspection process for the 2011 Key West World Championship Race – Super Boat International inspectors will collect each prop certification paper when inspecting your boat.
